Strawberry ‘Archer’ was first selected in 2001 and has been under trial since then.

- Large fruited, early mid-season variety
- Very aromatic, delicious flavor
- Ripens 5-6 days before ‘Jewel’
- June-bearing variety suited for NY growers
- High yield
- Holds large fruit size through multiple harvests for 2-3 weeks
- Largest average fruit size across 20 varieties tested at Cornell University’s New York State Agricultural Experiment Station (NYSAES) in Geneva, NY
- Fruit maximum size 45 g+ (comparable to plum fruit)
Strawberry ‘Archer’
Courtney Weber
Horticulture Section of the School of Integrative Plant Science

• Aromatic, delicious flavor
• Strong strawberry aroma
• Ripens 5-6 days before ‘Jewel’
• Early mid-season variety
