

CORNELL STRAWBERRY VARIETIES COMPARISON CHART

Variety	Season	Growing Qualities	Freezing Quality	Region	Licensing*				
					Exclusive	Non-Exclusive			
Strawberry 'Clancy' 	<table border="1"> <tr> <td>Early</td> <td>Mid</td> <td>Late</td> </tr> </table>	Early	Mid	Late	Hot weather tolerant; resistance to red stele	Very good	Temperate perennial production		
Early	Mid	Late							
<p>D3282: A June-bearing cultivar in New York State, 'Clancy' is characterized by its late season fruit maturation, and ability to produce a firm, flavorful berry that is tolerant of hot weather. 'Clancy' holds its berries high off the ground, making them less susceptible to fungal diseases that usually attack late-season crops. Both of its parents are resistant to red stele root rot. 'Clancy' offers strong yields of round, dark red fruit with good texture and eating quality.</p>									
Strawberry 'L'Amour' 	<table border="1"> <tr> <td>Early</td> <td>Mid</td> <td>Late</td> </tr> </table>	Early	Mid	Late	Good yield, vigorous plant, fancy calyx	Good	Temperate perennial production		
Early	Mid	Late							
<p>D3283: 'L'Amour' is an exceptional June-bearing strawberry. It bears in early mid-season, and yields glossy-red berries with remarkable flavor and attractiveness. 'L'Amour's' round-conical fruit is firm but not hard with a fancy calyx and excellent eating quality. It is characterized by strong vigor, large flowers, and uniformity in shape between primary and secondary fruit. With good winter hardiness, 'L'Amour' is primarily adapted to the growing conditions of west central New York and other regions of similar climate.</p>									
Strawberry 'Herriot' 	<table border="1"> <tr> <td>Early</td> <td>Mid</td> <td>Late</td> </tr> </table>	Early	Mid	Late	Cold weather tolerant; disease resistant	Good	Temperate perennial production		
Early	Mid	Late							
<p>D4771: This strawberry variety was bred for cooler climates. It is a mid-season, June bearing, very vigorous and disease resistant plant. The fruit is heart-shaped, shiny red with very good, mild flavor and with overtones of pineapple flavor. The fruit holds its size over an extended period and produces high yields.</p>									
Strawberry 'Archer' 	<table border="1"> <tr> <td>Early</td> <td>Mid</td> <td>Late</td> </tr> </table>	Early	Mid	Late	Cold weather tolerant; disease resistant	Good	Temperate perennial production		
Early	Mid	Late							
<p>D5074: 'Archer' previously tested as NY01-16 is a high-yield and early-season strawberry variety. This novel variety produces large and flavorful berries that are very aromatic. 'Archer' performs well either on matted-row culture or on plasticulture.</p>
